

# PfP Strategic Vision Roadmap for Person and Family Engagement—Metric Digest

## PFE Metric 1: Preadmission Planning Checklist

Person and family engagement (PFE) helps hospitals address what matters most to patients and families and improves hospitals' ability to achieve long-term improvements in quality and safety. Five PFE metrics<sup>1</sup> guide the implementation of PFE within the Partnership for Patients (PfP). The purpose of the five PFE metrics is to ensure that hospitals have, at a minimum, structures and practices that enable active patient and family partnership at three levels of the hospital setting: point of care, policy and protocol, and governance (see Exhibit 1).

**Exhibit 1: Partnership for Patients PFE Metrics, by Level of Hospital Setting**

This document provides guidance on the purpose and implementation of **PFE Metric 1 (preadmission planning checklist)**, including how to apply six PFE strategies to meet the metric in meaningful and equitable ways. The Person and Family Engagement Contractor for PfP has developed a metric digest for each PFE metric that draws from the [PfP Strategic Vision Roadmap for Person and Family Engagement](#). Please refer to the full Roadmap for further information on definitions and core principles of PFE, the role of PFE in patient safety, the intersection of PFE and health equity, and six PFE strategies to meet the five PFE metrics.

<sup>1</sup> The five PFE metrics are preadmission planning checklist (metric 1), shift change huddles OR bedside reporting (metric 2), designated PFE leader (metric 3), PFAC or representatives on hospital committee (metric 4), and patient representative(s) on board of directors.

## Appendix A. Applying the PFE Strategies to Meet the PFE Metrics in More Meaningful and Equitable Ways

Six overarching strategies are designed to help hospitals implement PFE practices—including the five PFE metrics—in ways that reflect and operationalize the core PFE principles.<sup>2</sup> The six strategies<sup>3</sup> are organizational partnership; patient and family preparation; clinician and leadership preparation; care, policy, and practice redesign; measurement and research; and transparency and accountability.

### PFE Strategies to Support Effective Implementation of PFE Metric 1: Preadmission Planning Checklist

PFE strategy	Tactics
 <b>Organizational partnership</b>	<ul style="list-style-type: none"><li>Get feedback from patients and families to better understand how they experience your current admission process. What information would they have liked to have that they did not get? What would have helped them feel more prepared for discharge? What is the best way for patients and families to receive this information (e.g., in person, phone call, mailing)?</li><li>Ask patient and family advisors (PFAs), including those that represent vulnerable populations, to review the preadmission planning checklist and processes to suggest improvements that better address patient and family preferences and needs and key safety and quality issues.</li><li>Ask PFAs to review other admission materials to provide feedback on how well they support and reinforce the messages of the preadmission discharge planning checklist and address the needs and concerns of patients.</li><li>Work with PFAs to develop processes for ensuring that the preadmission planning checklist is used throughout the hospital stay and in the discharge planning process.</li></ul>

<sup>2</sup> The core PFE principles are (1) PFE involves active partnership; (2) PFE happens at multiple levels; (3) PFE is about identifying and responding to patient- and family-identified needs and desired outcomes; (4) PFE is a partnership that requires individual *and* system behavior change; (5) “Family” is defined broadly and by the individual; (6) PFE must consider the values, preferences, and needs reflected in diverse populations; and (7) PFE is not a “check the box” activity—implementation quality affects results.

<sup>3</sup> The strategies listed below are adapted from the “[Roadmap for Patient and Family Engagement in Healthcare: Practice and Research](#)” and include information gathered during interviews with the 17 HENs in PfP 2.0. Developed by AIR, with funding from the Gordon and Betty Moore Foundation, the Roadmap reflects a unified vision for achieving meaningful PFE across the healthcare system and lays out a path to broader PFE by providing specific strategies, that, when implemented, can help achieve the goals of better care experiences, better health, lower costs, and improved safety.

Patients receive the guidebooks in required pre-op classes and also can get the guidebooks in clinics, receive them in the mail, or access them online. Michigan Medicine solicited input from staff and patients to develop the guidebooks, asking past and recent patients questions about their pre- and post-surgery experiences—for example, what patients wished they had known prior to surgery, what they wished they had asked during their care, and what did (or did not) work well during their stay. The guidebooks have helped Michigan Medicine reduce readmissions, length of stay, skilled nursing facility admissions, and opioid usage. In addition, the guidebooks have increased patient preparedness, with patients providing feedback that “everybody knows what to do.” To learn more, access the materials from the [July 2017 PFE Learning Event](#), “How to Create Opportunities to Engage with Patients and Families at Admissions and Beyond.”

Patients and family members	Clinicians and hospital staff
<ul style="list-style-type: none"> <li>Get to know the clinicians and staff on their care team and their roles.</li> <li>Be better prepared to participate in key discussions about their care, including bedside rounding, shift change huddles, and discharge planning meetings.</li> <li>Share information and ask questions about potential safety issues including those related to discharge planning (e.g., options for continuing care, post-discharge care instructions, and options for accessing community-based resources).</li> </ul>	<ul style="list-style-type: none"> <li>Invite patients and their care partners to be active members of their healthcare team.</li> <li>Understand preadmission medication regimens and therapy, allowing for better medication reconciliation and identification of potential medication errors.</li> <li>Identify and proactively address potential safety issues, risks, and care needs.</li> <li>Prepare patients and care partners and plan for a safe discharge.</li> </ul>

### Tips to Maximize Impact

- Work with clinicians, hospital staff, and patient/family advisors to ensure the checklist reflects the safety and quality needs and concerns of patients, families, clinicians, and hospital staff.
- Educate clinicians and staff about the benefits of using a checklist and train them on its use, including how to invite patients and families to partner in their care.
- Provide patients and care partners with a copy of the checklist prior to admission, allowing them to identify questions or concerns for discussion with clinicians and staff.
- Inform patients and care partners of any services that will help them participate in the planning checklist discussion (e.g., sign or language interpreters, patient navigators, community partners, peer mentors) and how they can access them.
- Document the conversation with the patient and care partner and share the information with the entire care team to promote ongoing communication throughout the stay and to improve patient safety.

**Appendix A** provides suggested activities to meet PFE metric 1. **Appendix B** provides a sample preadmission planning checklist, which HIINs and hospitals can tailor to meet their needs.

### PFE Metric 1 Success Story

*Michigan Medicine's pre-op guidebooks include simple checklists to prepare patients for surgery, helping to reduce hospital readmissions.*

Michigan Medicine, a premier academic medical center and part of the Vizient HIIN, created two pre-op guidebooks to share and discuss with patients prior to surgery: [Preparing and Recovering from My Hip Replacement Surgery](#) and [Preparing and Recovering from My Knee Replacement Surgery](#). The guidebooks include simple “Checklists for Success” that help patients prepare for surgery by providing information on items and over-the-counter medications to purchase, how to get ready the day before the surgery, information to bring to the surgery, recovery planning tips, and more.

**PfP Metric Language.** Hospital has a physical planning checklist that is discussed with every patient who has a scheduled admission.

**Do We Meet the Metric? YES, if:**

- Hospital has a physical planning checklist for patients with scheduled admissions,  
**AND**
- At admission, hospital staff discuss the checklist with patient and family.

***Alternative: Hospital has no scheduled admissions***

Hospitals are encouraged to consider and pursue options for achieving the intent of the metric. However, if a hospital does not conduct any scheduled admissions, PFE metric 1 does not apply. HIINs should calculate the percentage of hospitals implementing the metric based only on the hospitals in the HIIN that conduct scheduled admissions.

**Intent.** For all scheduled admissions, hospital staff discuss a checklist of items to prepare patients and families for the hospital stay—and invite them to be active partners in their care. The metric focuses on the use of the checklist by admissions staff, an admitting nurse or physician, or other healthcare professional to guide a conversation with patients and families at the earliest point possible before or during their care. Ideally, patients and families also receive a physical copy of the checklist. While there is not a standard checklist that must be used by all hospitals, the checklist should facilitate conversation about topics such as (1) what patients should expect during their stay (e.g., course of care, pain management); (2) patients' concerns and preferences for their care; (3) potential safety issues (e.g., preadmission medicines, history of infections); and (4) relevant home issues that may affect discharge, such as needs for additional support, transportation, and care coordination.

**Benefits.** When used effectively, the planning checklist is part of a process in which patients and families are encouraged to be active members of the healthcare team by sharing and receiving information, asking questions, and participating in care planning throughout the hospital stay. The planning checklist provides an invitation for patients and families to partner with the clinical care team throughout the stay to help ensure high-quality and safe care and to proactively address issues that may affect readmissions.

The use of a planning checklist can help—

Patients and family members	Clinicians and hospital staff
<ul style="list-style-type: none"><li>• Clarify expectations about what will happen before, during, and after their hospital stay.</li><li>• Feel more confident about being active partners in the quality and safety of their care.</li></ul>	<ul style="list-style-type: none"><li>• Understand the patient's specific care goals, preferences, needs, and concerns.</li><li>• Identify the person who will serve as the patient's care partner helping in care and care planning during and after the stay.</li></ul>

PFE strategy	Tactics
 <p><b>Patient and family preparation</b></p>	<ul style="list-style-type: none"> <li>Provide patients and family members with information to help them prepare for and understand their hospital stay—for example, what to bring to the hospital; the types of care providers they will be interacting with (attending physicians, residents, interns, physician assistants, nurse practitioners, nurses, nurses' aides, other care staff); how often they will interact with these care providers and in what ways; what routine processes they will experience (e.g., monitoring of vital signs); and any tests or additional procedures associated with their specific admission.</li> <li>Provide patients and family members with the opportunity to ask questions prior to, during, and after their hospital stay.</li> <li>Help patients and family members understand what they can do during their hospital stay to be engaged in the quality and safety of care provided, including who to talk to if they have questions or information to share, including how they are feeling.</li> <li>Educate patients and families about expectations for their active participation during the hospital stay—for example, asking questions, providing clinical care staff with important information about their health, and speaking up when something doesn't feel "right."</li> <li>Inform patients and families about opportunities for partnership during the hospital stay, such as participating in bedside rounds, nurse bedside shift report, discharge planning, and others.</li> <li>Encourage patients and families to participate in a discussion with admission staff about the preadmission planning checklist and to voice their preferences, concerns, and needs, including those related to language, health literacy, and/or cultural beliefs.</li> </ul>
 <p><b>Clinician, staff, and leadership preparation</b></p>	<ul style="list-style-type: none"> <li>Inform clinicians and staff about the use and purpose of the preadmission planning checklist, including why it is important and how it can help engage patients and families.</li> <li>Educate clinicians and staff about how the preadmission planning checklist should be discussed and used at various stages during the hospital stay to adjust the care plan as needed to reflect patients' and families' preferences, needs, and concerns.</li> <li>Delineate key roles and responsibilities to ensure accountability for reviewing and discussing the checklist with patients and family members.</li> <li>Educate providers in exhibiting cultural competence while using the checklist; promote self-awareness of biases and of variation in cultural meanings, stigma, or other cultural sensitivities and avoidance of stereotypes or generalizations.</li> </ul>

PFE strategy	Tactics
 <b>Care, policy, and process redesign</b>	<ul style="list-style-type: none"> <li>Examine the process around the use of the preadmission planning checklist. Identify changes that may be needed to ensure that the checklist moves beyond a static document to one that facilitates discussion, is updated throughout the hospital stay, and is incorporated into patients' records.</li> <li>Review how the preadmission planning checklist is currently being distributed to all patients—regardless of age, race or ethnicity, language, or disability—to determine whether it is reaching all patients and family members at the appropriate time and via a mechanism that is most appropriate for them.</li> <li>Identify who has responsibility for reviewing the preadmission planning checklist with patients and family members and ensure that this task is integrated with the admission process and workflow.</li> <li>Identify barriers that may be affecting the ability of specific members of your patient and family population to engage. For example, is there a need for interpreters or language translation services to better improve engagement in the process?</li> </ul>
 <b>Measurement and research</b>	<ul style="list-style-type: none"> <li>Collect data about the demographic and socioeconomic status of the hospital's patient population and the surrounding community to account for and assess potential barriers to use or applicability in the development of the checklist.</li> <li>Develop plans for collecting and recording information about use of the checklist, including clearly defining what it means to "use" a preadmission planning checklist in a way that reflects the core principles of PFE.</li> <li>Set specific goals to assess progress against (e.g., to provide and discuss the preadmission planning checklist with 100 percent of patients who have planned admissions).</li> <li>Collect patient, family, clinician, and staff feedback about the planning checklist and use it to refine the tool and processes related to its use. Ensure that feedback is solicited from vulnerable populations.</li> <li>Conduct small tests of change to identify the most effective processes for using the preadmission planning checklist.</li> <li>Develop plans to collect data on how the checklist improves the patient and clinician experience and safety outcomes.</li> </ul>
 <b>Transparency and accountability</b>	<ul style="list-style-type: none"> <li>Let patients and families know about the emphasis placed on preadmission planning, why it is important for quality and safety, how it can help facilitate discharge planning and reduce readmissions, and what your hospital is doing to make improvements.</li> <li>Report data collected about use of the preadmission planning checklist to leaders, clinicians, staff, and patients and families. Capture successes and acknowledge areas for improvement. Stratify data by various patient characteristics (e.g., REaL) to identify any gaps in use that may be present.</li> </ul>

## Appendix B. Sample Preadmission Planning Checklist

For all scheduled admissions, hospital staff should discuss a checklist of items to prepare patients and families for the hospital stay. Through this process, hospital staff should invite patients and families to be active partners in their care. Admissions staff, an admitting nurse or physician, or other healthcare professional should use the checklist to guide a conversation with patients and families at the earliest point possible before or during their care.

**PFE Metric 1:** Hospital has a physical planning checklist that is discussed with every patient who has a scheduled admission.

Although hospitals are not required to provide a physical checklist to patients to meet PFE Metric 1, it is best practice to do so. Hospitals that wish to do so can tailor and provide the following checklist to patients and their care partners to facilitate a discussion—at the earliest point possible—about how to be partners on their care team to help ensure safety and reduce harm. For hospitals that do not provide a planning checklist to patients and their care partners, this sample checklist can be used to identify topics to discuss with patients and their care partners. This sample checklist is not intended to replace hospitals' existing preadmission and admission materials or discharge instructions and materials for patients. Rather, it is designed to supplement these materials by preparing patients and their care partners to anticipate discharge to another facility or home.

*Note:* The checklist was developed by the Patient and Family Engagement contractor with input from HIINs, hospital staff, patient and family advisors, HIIN staff, and PFE committees.

# HOW TO PREPARE FOR A SAFE HOSPITAL STAY

You and your care partner are important members of your hospital care team. Other members include doctors, nurses and staff who will care for you during your hospital stay.

**We invite you to partner with us in your care.** Just like you, our goal is to make sure that you get the best and safest care.

Use this checklist to help you get ready for your admission to the hospital and your hospital stay. The staff member who admits you to the hospital will review and talk to you about this information and also answer any questions you might have.

## ► Before Admission to the Hospital

**Choose at least one trusted family member or friend to be your care partner. A care partner is someone who can:**

- Help you with your care and making decisions about your care
- Support your recovery in the hospital and at home after you leave
- Help make sure that your preferences, values and goals are used in care planning

**Bring the following important items with you to the hospital:**

- List of all medicines you take including over-the-counter medicines, vitamins and supplements (include reason for taking, dose, time you take and how you take them)
- Allergies to medications or food
- Names and phone numbers of your primary care doctors and specialists
- Your insurance information
- Your wishes about care and treatment in case you become unable to speak for yourself (bring any written forms you have such as an Advance Directive for Care or Living Will)
- A small notebook to keep track of important information

**Talk to your doctor who is admitting you to the hospital to get the information you want and need about:**

- Your treatment or surgery
- Diagnosis or condition
- Tests you will have
- Medicines you will be given
- How your pain will be safely managed
- How long you will be in the hospital and if it is likely you will need to go to a rehabilitation hospital or skilled nursing facility before you go home
- Any physical therapy or other therapies you will receive in the hospital

	Hospital Name Address Address 2 Address 3	Phone Phone 2 Email Web address
---	--	--

## ► When You Are Admitted to the Hospital

Learn about who is on your team by asking:

- Who will be taking care of you and what they will do
- How to contact them
- How to contact the hospital's patient advocate

Find out about how you and your care partner can share and get information and be part of care planning. This includes:

- During **rounds** when your doctors, others on the team and you plan your care
- During **nurse change of shift report** when one nurse is finishing a shift and shares important information about your care with the nurse starting the shift
- In **planning meetings for discharge or transition** to your home or another care setting
- On a **whiteboard** in your hospital room
- Through an **online patient portal**

Safety is key! We all work together to make sure your care is safe. Speak up at any time with any concerns you have. Talk with your team about the best ways to:

- Make sure everyone washes their hands – family, friends, staff and doctors
- Help prevent infections
- Help prevent pressure injuries (sometimes called bed sores)
- Protect yourself from falling
- Make sure your patient identification is correct and is checked especially before tests, procedures and being given medicines
- Make sure that all doctors, nurses and staff introduce themselves and explain what they are going to do before giving you any medicine or before a treatment or test
- Make sure your surgery site is correctly marked on your body or you are getting the correct test or procedure
- Be aware of side effects of treatment and medicines
- Learn about symptoms and danger signs to watch out for
- Know what to do and who to talk to about concerns if you or your care partner thinks something does not seem “right”

## ► Before You Leave the Hospital

Talk with your team as early as possible about how you and your care partner can get ready to leave the hospital. You will get specific discharge instructions before you leave the hospital but you can talk with your team at any time about:

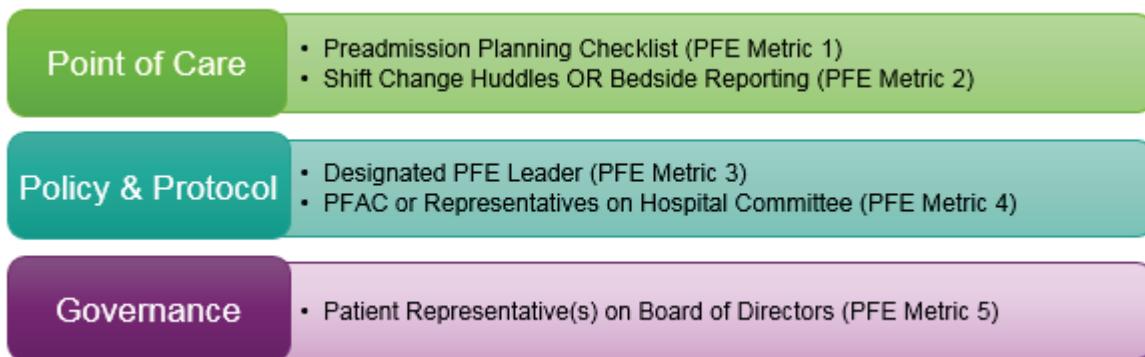

- Your medicines and what they are for and how to take them properly
- Serious signs and symptoms to look out for once you get home, what to do if you see them and who to call if you have concerns
- What to expect in your recovery
- Instructions for care related to your surgery or treatment
- Instructions for what you should and should not eat and drink
- Need for additional therapy, home care, support or equipment at home
- Follow-up appointments
- How doctors and staff will share information with your primary care doctors and specialists

# PfP Strategic Vision Roadmap for Person and Family Engagement—Metric Digest

## PFE Metric 2: Shift Change Huddles OR Bedside Reporting

Person and family engagement (PFE) helps hospitals address what matters most to patients and families and improves hospitals' ability to achieve long-term improvements in quality and safety. Five PFE metrics<sup>1</sup> guide the implementation of PFE within the Partnership for Patients (PfP). The purpose of the five PFE metrics is to ensure that hospitals have, at a minimum, structures and practices that enable active patient and family partnership at three levels of the hospital setting: point of care, policy and protocol, and governance (see Exhibit 1).

**Exhibit 1: Partnership for Patients PFE Metrics, by Level of Hospital Setting**

This document provides guidance on the purpose and implementation of **PFE Metric 2 (shift change huddles OR bedside reporting)**, including how to apply six PFE strategies to meet the metric in meaningful and equitable ways. The Person and Family Engagement Contractor for PfP has developed a metric digest for each PFE metric that draws from the [PfP Strategic Vision Roadmap for Person and Family Engagement](#). Please refer to the full Roadmap for further information on definitions and core principles of PFE, the role of PFE in patient safety, the intersection of PFE and health equity, and six PFE strategies to meet the five PFE metrics.

<sup>1</sup> The five PFE metrics are preadmission planning checklist (metric 1), shift change huddles OR bedside reporting (metric 2), designated PFE leader (metric 3), PFAC or representatives on hospital committee (metric 4), and patient representative(s) on board of directors.

**PfP Metric Language.** Hospital conducts shift change huddles or bedside reporting with patients and family members in all feasible cases.

**Do We Meet the Metric? YES, if:**

- In as many units as possible, but in a minimum of at least one unit, nurse shift change huddles **OR** clinician reports/rounds occur at the bedside and involve the patient and/or care partners.

**Alternative: None**

This activity should be possible in all hospital types and structures. However, a hospital may offer alternatives to accommodate patient and care partner participation (e.g., adjust time of shift changes, offer options for care partners to participate via phone or Skype).

**Intent.** The intent of this metric is to include patients and care partners as active participants in as many conversations about their care as possible throughout the hospital stay. They should have the opportunity to question, correct or confirm, and learn more about the next steps in their care as it is discussed between nurses changing shifts and/or clinicians making rounds. Patients and care partners should be encouraged and prompted by clinical staff to be active participants in these meetings to whatever degree they desire and to add to the information being shared between nurses or other clinicians.

**Benefits.** Bedside shift change huddles, bedside reporting, and bedside rounding facilitate the transfer of critical information between staff, patients, and care partners to improve communication, prevent potential safety events and medical errors, improve time management and accountability between nurses—and, ultimately, improve patient, family, and nurse staffing satisfaction.

Bedside shift change huddles and bedside reporting with patients and family members can help—

Patients and family members	Clinicians and hospital staff
<ul style="list-style-type: none"><li>• Hear what has occurred throughout the shift and learn about the next steps in their care.</li><li>• Ask questions, correct errors, and provide input based on their preference and values.</li><li>• Increase knowledge of their condition and treatment so that they can participate in their care to the extent they want.</li><li>• Understand that they are important members of the care team.</li></ul>	<ul style="list-style-type: none"><li>• Reinforce teamwork and ensure that every member of the team shares knowledge that contributes to safe and effective care.</li><li>• Increase patient and family participation, knowledge, and satisfaction.</li><li>• Create a heightened awareness of individual patient needs that can be proactively addressed throughout the shift.</li><li>• Improve time management and accountability between nurses.</li></ul>

## Tips to Maximize Impact

- Collect patient, care partner, clinician, and staff feedback about the shift change huddle or bedside reporting process and use this feedback to refine processes and policies. Ensure that feedback is solicited and obtained from vulnerable populations.
- Involve a multidisciplinary team in shift change huddles to reinforce teamwork and ensure that every member of the team, including the patient and care partner, shares knowledge that contributes to safe and effective patient care.
- Involve the patient and care partner in the entire conversation concerning their care, not just select parts.
- Encourage or prompt the patient and/or care partner to participate in conversations about their care through the hospital stay, to whatever degree they desire.

The **Appendix** provides suggested activities to meet PFE metric 2.

## PFE Metric 2 Success Story

***Care team rounds with patients and families promote patient safety and improve patient satisfaction at Perham Health.***

Perham Health in Perham, Minnesota, a critical access hospital in the Minnesota Hospital Association HIIN, introduced a new model, called “Care Team Rounds,” that involves patients and families at the bedside. A social worker leads the team, which includes the charge nurse, nurse leader, patient’s nurse, pharmacy, occupational therapy, and physical therapy. The social worker requests permission from the patient or family each day to conduct the care team rounds. During the rounds, the charge nurse reviews the patient’s admission diagnosis and care in plain language for the patient, family, and care team. The care team asks the patients and family if they have concerns or comments about their care and uses the time to identify opportunities for improvement, provide updates to the group, and answer questions. Since implementation of care team rounds, Perham Health has noted enhanced communication with patients and families, promotion of safety, improvement of multidisciplinary communication, enriched discharge planning, and improvements in patient satisfaction.

## Appendix. Applying the PFE Strategies to Meet the PFE Metrics in More Meaningful and Equitable Ways

Six overarching strategies are designed to help hospitals implement PFE practices—including the five PFE metrics—in ways that reflect and operationalize the core PFE principles.<sup>2</sup> The six strategies<sup>3</sup> are organizational partnership; patient and family preparation; clinician and leadership preparation; care, policy, and practice redesign; measurement and research; and transparency and accountability.

### PFE Strategies to Support Effective Implementation of PFE Metric 2: Shift Change Huddles or Bedside Reporting

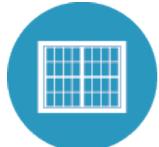

PFE strategy	Tactics
 <b>Organizational partnership</b>	<ul style="list-style-type: none"><li>Engage patients and families in the development and implementation of process changes related to shift change huddles, bedside reporting, and/or bedside rounding by asking them to share feedback on current processes, including how patients currently experience shift change. As appropriate, work with patients and families to share their experiences to illustrate why changes are needed, particularly those that are responsive to vulnerable populations.</li><li>Work with PFAs to plan and implement shift change huddles, bedside reporting, and/or bedside rounding (e.g., partnering to adapt existing tools and resources to your organization) and involve them in staff training (e.g., participating in role plays or sharing stories).</li><li>Ask diverse partners to assess the bedside reporting/shift change processes and suggest improvements to address needs better.</li><li>Ask PFAs to participate in monitoring and evaluation efforts to ensure that bedside reporting, shift change huddles, and/or bedside rounding is being implemented in ways that invite and welcome participation from patients and families.</li></ul>

<sup>2</sup> The core PFE principles are (1) PFE involves active partnership; (2) PFE happens at multiple levels; (3) PFE is about identifying and responding to patient- and family-identified needs and desired outcomes; (4) PFE is a partnership that requires individual *and* system behavior change; (5) “Family” is defined broadly and by the individual; (6) PFE must consider the values, preferences, and needs reflected in diverse populations; and (7) PFE is not a “check the box” activity—implementation quality affects results.

<sup>3</sup> The strategies listed below are adapted from the “[Roadmap for Patient and Family Engagement in Healthcare: Practice and Research](#)” and include information gathered during interviews with the 17 HENs in PfP 2.0. Developed by AIR, with funding from the Gordon and Betty Moore Foundation, the Roadmap reflects a unified vision for achieving meaningful PFE across the healthcare system and lays out a path to broader PFE by providing specific strategies, that, when implemented, can help achieve the goals of better care experiences, better health, lower costs, and improved safety.

PFE strategy	Tactics
 <p><b>Patient and family preparation</b></p>	<ul style="list-style-type: none"> <li>On admission, orient patients and families about what bedside reporting, shift change huddles, and/or bedside rounding are, what will happen, who is involved, and how much time it will take.</li> <li>Educate patients and families about how they can and should participate in bedside reporting, shift change huddles, and/or bedside rounding, including providing examples of questions to ask, observations to share, and issues to raise.</li> <li>Inform patients and care partners of any services available at the hospital that will help them participate in bedside reporting (e.g., sign or language interpreters, patient navigators, community partners, peer mentors) and how they can access them.</li> <li>Educate patients and families about how bedside reporting, shift change huddles, and/or bedside rounding can help address and prevent safety issues during the hospital stay.</li> </ul>
 <p><b>Clinician, staff, and leadership preparation</b></p>	<ul style="list-style-type: none"> <li>Educate leadership, front-line managers, clinicians, and staff about how bedside reporting, shift change huddles, and/or bedside rounding can help improve safety and quality. Share success stories from other organizations.</li> <li>Invite leadership to do “walkabouts” to better understand how care is happening “on the floor” and to illustrate why changes are needed.</li> <li>Educate front-line managers, clinicians, and staff about the critical elements of bedside reporting, shift change huddles, and/or bedside rounding and provide examples of what they look like when implemented effectively.</li> <li>Identify and directly address concerns that may become barriers to effective implementation of bedside reporting, shift change huddles, and/or bedside rounding (e.g., concerns about how much time it will take, how to share sensitive information, or how to deal with HIPAA concerns).</li> <li>Provide training opportunities for staff to practice new skills and ask questions, using training mechanisms that are most appropriate for and effective in your environment.</li> <li>Educate providers and leaders on cultural differences in nonverbal communication styles, health beliefs, and the role of family and community.</li> </ul>

PFE strategy	Tactics
 <p><b>Care, policy, and process redesign</b></p>	<ul style="list-style-type: none"> <li>• Develop policies to ensure that bedside reporting, shift change huddles, and/or bedside rounding are “always” events (i.e., every patient, all diagnoses). Clearly specify whether and in what situations it is acceptable to not report at the bedside and what the alternative practice should be in those cases.</li> <li>• Specify who is involved in shift change huddles and bedside reporting (e.g., nurses, nursing assistants, patient, family member [honoring patient’s preferences for family member(s) presence and participation], others) and bedside rounding (e.g., attending physicians, residents, primary nurse, charge nurse, rehabilitation services, dietary team, palliative care).</li> <li>• Specify the critical elements of bedside reporting, shift change huddles, and/or bedside rounding to ensure standardized implementation that truly reflects PFE. For example, critical elements of shift change huddles conducted at the bedside may include the following: (1) Introduce staff to patients and family members and make a personal connection with patients—for example, by making eye contact and smiling if appropriate; (2) Review the patient’s background, current situation, and plans for the upcoming shift while standing at the patient’s bedside and talking to the patient and family; (3) Conduct a safety check of the room (e.g., to assess fall risk, inspect IV sites); (4) Update white board with information for the upcoming shift; and (5) Ask patient or family member if they have anything to add or have any questions.</li> <li>• Specify tools that should be included as part of bedside reporting, shift change huddles, and/or bedside rounding (e.g., SBAR, check back, checklists).</li> <li>• Assess what changes and resources may be needed to support bedside reporting, shift change huddles, and/or bedside rounding (e.g., staffing changes, changes in timing of shifts, equipment such as mobile workstations, technology that facilitates inclusion of additional members of the care team in bedside reporting).</li> <li>• Provide translation services as needed to facilitate communication during bedside reporting, shift change huddles, and/or bedside rounding.</li> <li>• Implement family presence policies to eliminate barriers to family participation in bedside reporting, shift change huddles, and/or bedside rounding according to patient preference.</li> <li>• Consider processes or technology that could be implemented to support remote attendance by families in bedside reporting, shift change huddles, and/or bedside rounding (e.g., video or audio conferencing, video or audio recording).</li> </ul>

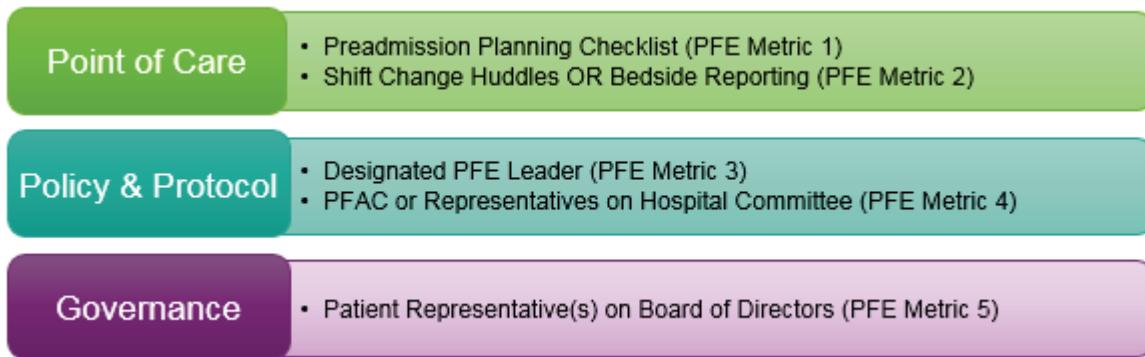

PFE strategy	Tactics
 <b>Measurement and research</b>	<ul style="list-style-type: none"> <li>Clearly define the behaviors that indicate whether bedside reporting, shift change huddles, and/or bedside rounding is being implemented as intended and in a manner that reflects the core principles of PFE (e.g., specify the critical elements that indicate bedside reporting has occurred in a way that truly includes patients and families; see third bullet above under “Care, policy, and process redesign”).</li> <li>Set specific performance goals (e.g., have 95 percent of nurses doing shift change huddles at the bedside within 4 months).</li> <li>Obtain feedback from patients, families, clinicians, and staff about how they experience shift change huddles and bedside reporting and solicit suggestions for improvement. Ensure that feedback is solicited and obtained from vulnerable populations.</li> <li>Develop processes for ongoing monitoring (e.g., having PFAs shadow or observe nurses as part of monitoring efforts).</li> <li>Identify performance data that can help determine whether and how shift change huddles and bedside reporting are affecting outcomes (e.g., HCAHPS scores, employee satisfaction scores, number of days without a safety event).</li> <li>Develop plans for conducting a pre- and post-implementation evaluation of bedside reporting, shift change huddles, and/or bedside rounding (e.g., collect data to show how much time shift change takes pre- and post-implementation of bedside shift report, look at HCAHPS scores for time periods pre- and post-implementation).</li> <li>Link monitoring to ensure that processes are occurring as intended with outcome data (e.g., do HCAHPS scores fall when nurses are not implementing all critical elements of bedside shift reporting?).</li> <li>Collect REaL data to allow examination of health equity issues related to performance data.</li> </ul>
 <b>Transparency and accountability</b>	<ul style="list-style-type: none"> <li>Report data collected about the conduct of bedside reporting and patient experiences to stakeholders; stratify data by various patient characteristics (e.g., REaL) to identify any gaps that may be present.</li> <li>Celebrate safety catches and team accomplishments. Share success stories and challenges with leadership, staff, and patients and families.</li> <li>Let patients and families know about the emphasis placed on bedside reporting, why it is important for quality and safety, and what your hospital is doing to make improvements.</li> </ul>

# PfP Strategic Vision Roadmap for Person and Family Engagement—Metric Digest

## PFE Metric 3: Designated PFE Leader

Person and family engagement (PFE) helps hospitals address what matters most to patients and families and improves hospitals' ability to achieve long-term improvements in quality and safety. Five PFE metrics<sup>1</sup> guide the implementation of PFE within the Partnership for Patients (PfP). The purpose of the five PFE metrics is to ensure that hospitals have, at a minimum, structures and practices that enable active patient and family partnership at three levels of the hospital setting: point of care, policy and protocol, and governance (see Exhibit 1).

**Exhibit 1: Partnership for Patients PFE Metrics, by Level of Hospital Setting**

This document provides guidance on the purpose and implementation of **PFE Metric 3 (designated PFE leader)**, including how to apply six PFE strategies to meet the metric in meaningful and equitable ways. The Person and Family Engagement Contractor for PfP has developed a metric digest for each PFE metric that draws from the *PfP Strategic Vision Roadmap for Person and Family Engagement*. Please refer to the full Roadmap for further information on definitions and core principles of PFE, the role of PFE in patient safety, the intersection of PFE and health equity, and six PFE strategies to meet the five PFE metrics.

<sup>1</sup> The five PFE metrics are preadmission planning checklist (metric 1), shift change huddles OR bedside reporting (metric 2), designated PFE leader (metric 3), PFAC or representatives on hospital committee (metric 4), and patient representative(s) on board of directors.

**PfP Metric Language.** Hospital has a designated individual (or individuals) with leadership responsibility and accountability for PFE.

### Do We Meet the Metric? YES, if:

- There is a named hospital employee (or employees) responsible for PFE efforts at the hospital either in a full-time position or as a percentage of time within their current position, **AND**
- Appropriate hospital staff and clinicians can identify the person named as responsible for PFE at the hospital.

### *Alternative: None*

This activity should be possible in all hospital types and structures.

**Intent.** The intent of this metric is to ensure that PFE efforts are built into the management of hospital operations and given the attention and resources needed to be successful and sustained over time. The hospital should identify at least one staff member who is responsible and accountable for overseeing PFE efforts at the hospital, including identifying, implementing, monitoring, and evaluating PFE activities. Hospitals may also designate multiple individuals within an office or department (e.g., Patient Experience Office, Quality Improvement) as having responsibility for PFE efforts. The person(s) responsible for PFE at the hospital does not need to have a specific title or position or be 100 percent focused on PFE, but all hospital staff should be aware that this person coordinates the hospital's PFE plans and activities.

**Benefits.** Designating an individual helps integrate the work of PFE into a hospital's organizational structure, systematize PFE, promote accountability, and ensure continued progress toward a strategic vision of PFE. It also helps establish and sustain a culture of PFE that moves beyond short-term changes to integrate the core principles of PFE throughout the hospital. Finally, it sends a strong signal to hospital leaders, clinicians, staff, patients and care partners, and community members about the hospital's commitment to partnering with patients and families to provide high-quality and safe care.

### Tips to Maximize Impact

- To the extent possible, integrate the person/position into an existing office or department that supports patient safety, patient experience, and/or quality improvement initiatives to leverage existing resources.
- Have the person/position with responsibility for PFE report directly to hospital leadership to elevate and reinforce the critical role of PFE in the hospital.

- Associate the following responsibilities with PFE oversight and accountability:
  - Working with hospital leaders—e.g., creating strategic plans for PFE, collaborating with leaders to implement PFE best practices.
  - Identifying, implementing, and overseeing PFE activities—e.g., recruiting, training, and overseeing the work of PFAs and PFACs, reporting accomplishments.
  - Assessing and continually improving PFE performance—e.g., establishing and disseminating short- and long-term PFE goals, developing and assisting with evaluation, monitoring, and feedback activities.
- Develop processes for evaluating the activities and impact of the PFE leader that are inclusive of diverse patient and family participation, input, and feedback.

The **Appendix** provides suggested activities to meet PFE metric 3.

### PFE Metric 3 Success Story

***Evidence-based practices help Barton Healthcare leaders wear multiple hats to promote and support PFE.***

In 2013, the CEO of Barton Healthcare in South Lake Tahoe, California—a member of the Health Services Advisory Group (HSAG) HIIN—asked the hospital’s director of quality improvement to look into starting a PFAC. To get started, the director of quality improvement formed a subgroup with the director of public relations and the patient safety officer. The subgroup members maintained their existing work, volunteering time for the new project due to their belief in the value of PFACs. The subgroup researched evidence-based best practices to build on existing knowledge related to PFACs and to make their business case to leadership. They also utilized existing budgets from various departments to fund the development of the PFAC, including the costs associated with hosting PFAC meetings. Today, Barton Health’s annual PFAC budget of about \$500 covers snacks and supplies for meetings. To learn more, access the materials from the [May 2017 PFE Learning Event](#), “How to Help Hospitals Get Started on the PFE Journey.”

## Appendix. Applying the PFE Strategies to Meet the PFE Metrics in More Meaningful and Equitable Ways

Six overarching strategies are designed to help hospitals implement PFE practices—including the five PFE metrics—in ways that reflect and operationalize the core PFE principles.<sup>2</sup> The six strategies<sup>3</sup> are organizational partnership; patient and family preparation; clinician and leadership preparation; care, policy, and practice redesign; measurement and research; and transparency and accountability.

### PFE Strategies to Support Effective Implementation of PFE Metric 3: Designated PFE Leader

PFE strategy	Tactics
 <b>Organizational partnership</b>	<ul style="list-style-type: none"><li>• Develop relationships and partnerships with other healthcare organizations and stakeholders to engage in peer-to-peer learning, including best practices on how to create and support a position for a designated PFE leader.</li><li>• Ask Patient Advocates (employed at the hospital) and PFAs to provide feedback about how PFE could be systematized within the organization, including their perspectives about the best ways to ensure oversight and coordination of policies and procedures that support PFE.</li><li>• Ask Patient Advocates and PFAs to help develop a job description for the PFE oversight position and participate in interviewing candidates.</li><li>• Once the functional area/individual is identified, ask Patient Advocates and PFAs to provide feedback about how the office, department, or individuals who have responsibility for PFE oversight are functioning from the patient and family perspective. What are the areas of strength? Where is there room for improvement?</li><li>• Create linkages with community agencies and organizations that support the hospital's vulnerable populations and engage them as experts to help PFE leadership learn about and interact regularly with these diverse populations.</li></ul>

<sup>2</sup> The core PFE principles are (1) PFE involves active partnership; (2) PFE happens at multiple levels; (3) PFE is about identifying and responding to patient- and family-identified needs and desired outcomes; (4) PFE is a partnership that requires individual *and* system behavior change; (5) “Family” is defined broadly and by the individual; (6) PFE must consider the values, preferences, and needs reflected in diverse populations; and (7) PFE is not a “check the box” activity—implementation quality affects results.

<sup>3</sup> The strategies listed below are adapted from the “[Roadmap for Patient and Family Engagement in Healthcare: Practice and Research](#)” and include information gathered during interviews with the 17 HENs in PfP 2.0. Developed by AIR, with funding from the Gordon and Betty Moore Foundation, the Roadmap reflects a unified vision for achieving meaningful PFE across the healthcare system and lays out a path to broader PFE by providing specific strategies, that, when implemented, can help achieve the goals of better care experiences, better health, lower costs, and improved safety.

PFE strategy	Tactics
 <p><b>Patient and family preparation</b></p>	<ul style="list-style-type: none"> <li>Inform patients and families where responsibility for PFE oversight lies within the organization, provide names and roles of key individuals, and provide information about how to contact and provide feedback to them.</li> <li>Ensure that PFAC members and advisors know who has responsibility for PFE oversight, including communicating PFAC feedback, work, and accomplishments to hospital leadership. Provide information about how to contact and provide feedback to the office or individuals with responsibility for PFE oversight.</li> <li>Have the PFE leader conduct PFE rounding to reinforce the importance of their engagement and confirm that communications and education efforts were successfully understood by patients and family members. Consider preparing a PFAC member to participate on these rounds.</li> </ul>
 <p><b>Clinician, staff, and leadership preparation</b></p>	<ul style="list-style-type: none"> <li>Inform clinicians and staff, including Patient Advocates, about who is responsible for PFE oversight in the organization and ensure that clinicians and staff understand the specific roles and responsibilities of individuals with accountability for PFE, including how these individuals will work with and support clinicians and staff.</li> <li>Educate leadership about how identifying a functional area or individual with responsibility for PFE will benefit the organization, including improving accountability for performance.</li> <li>Include the PFE leader in organizational discussions and decisions to ensure that his or her valuable insights are heard and considered by those at the top of the organization.</li> <li>Identify a patient engagement executive and physician sponsor for each entity across the hospital system.</li> <li>Develop tools, guided by the PFE leader, to help clinicians better implement PFE with vulnerable populations.</li> </ul>

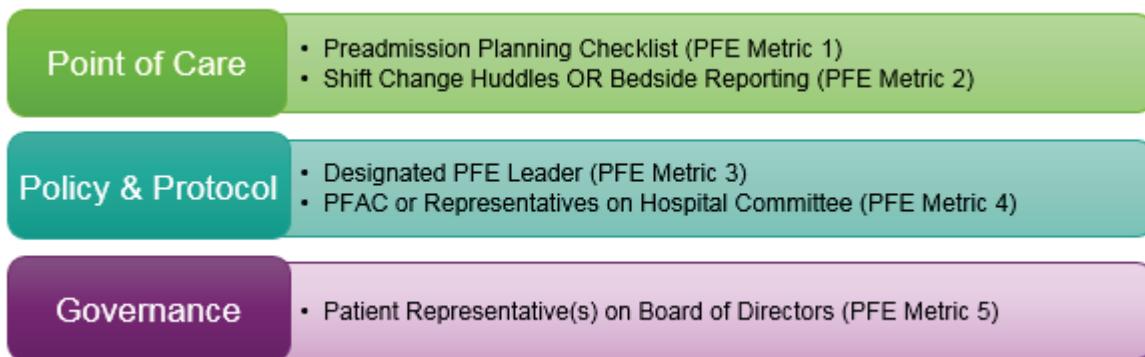

PFE strategy	Tactics
 <b>Care, policy, and process redesign</b>	<ul style="list-style-type: none"> <li>Determine where the individual or office with responsibility for PFE oversight will sit within the organizational structure. Who will they report to? Who will report to them? What groups does their work overlap or intersect with? Does their location signal that this is important to leadership?</li> <li>Identify the specific activities for which the functional area or person has responsibility and develop a clear position description. Is responsibility shared with other offices, groups, or individuals?</li> <li>Identify mechanisms for touch points and regular communication with hospital leadership.</li> <li>Plan for distribution of knowledge and responsibilities to ensure sustainability (e.g., ensure that oversight of PFE is not contingent upon the contributions of a single individual).</li> <li>Create a corporate structure that allows for multiple PFE champions. For example, create subcommittees to address different aspects of PFE (e.g., Patient Education Subcommittee, Staff Education Subcommittee, Patient Experience Subcommittee) and designate leaders for each of these committees. Invite PFAs to serve as members on these committees.</li> <li>Include staff leader for cultural competency or diversity on PFE leadership team.</li> </ul>
 <b>Measurement and research</b>	<ul style="list-style-type: none"> <li>Research where responsibility for PFE is situated within the organizational structure of other hospitals.</li> <li>Identify processes for assessing the effectiveness of the functional area or person with responsibility for PFE implementation and evaluation (e.g., individual performance evaluation, leadership or board review of functional area). Ensure that these processes are inclusive of diverse patient and family participation, input, and feedback.</li> <li>Identify metrics that can be used to assess performance of functional area or person based on expectations and job description (e.g., number of PFE initiatives launched and related outcomes; number of PFAs or PFACs established; number of projects, committees, or workgroups that included patients and families; whether PFAs felt prepared to participate).</li> </ul>
 <b>Transparency and accountability</b>	<ul style="list-style-type: none"> <li>Create opportunities for visibility where individuals who have responsibility for PFE can interact with clinicians, staff, patients, and the broader community.</li> <li>Report on evaluation metrics of the PFE leader or functional area's impact on clinical care processes and diverse patient and family experiences.</li> <li>Share experiences and lessons learned with other hospitals, hospital staff, patients, families, and the community at large.</li> </ul>

# PfP Strategic Vision Roadmap for Person and Family Engagement—Metric Digest

## PFE Metric 4: PFAC or Representatives on Hospital Committee

Person and family engagement (PFE) helps hospitals address what matters most to patients and families and improves hospitals' ability to achieve long-term improvements in quality and safety. Five PFE metrics<sup>1</sup> guide the implementation of PFE within the Partnership for Patients (Pfp). The purpose of the five PFE metrics is to ensure that hospitals have, at a minimum, structures and practices that enable active patient and family partnership at three levels of the hospital setting: point of care, policy and protocol, and governance (see Exhibit 1).

**Exhibit 1: Partnership for Patients PFE Metrics, by Level of Hospital Setting**

This document provides guidance on the purpose and implementation of **PFE Metric 4 (PFAC or representatives on hospital committee)**, including how to apply six PFE strategies to meet the metric in meaningful and equitable ways. The Person and Family Engagement Contractor for PfP has developed a metric digest for each PFE metric that draws from the [Pfp Strategic Vision Roadmap for Person and Family Engagement](#). Please refer to the full Roadmap for further information on definitions and core principles of PFE, the role of PFE in patient safety, the intersection of PFE and health equity, and six PFE strategies to meet the five PFE metrics.

<sup>1</sup> The five PFE metrics are preadmission planning checklist (metric 1), shift change huddles OR bedside reporting (metric 2), designated PFE leader (metric 3), PFAC or representatives on hospital committee (metric 4), and patient representative(s) on board of directors.

**PfP Metric Language.** Hospital has an active Patient and Family Advisory Council (PFAC) **OR** at least one patient who serves on a patient safety or quality improvement committee or team.

**Do We Meet the Metric? YES, if:**

- Patient and/or family representatives from the community have been formally named as members of a PFAC or other hospital committee, **AND**
- Meetings of the PFAC or other committees with patient and family representatives have been scheduled and conducted.

**Alternative: None**

The two options possible for accomplishing this metric are designed to accommodate hospitals with varying levels of experience working with PFAs. While a PFAC is the recommended best practice, it also is acceptable for a hospital to identify and prepare at least one PFA (and, ideally, at least three to four) from the community to serve on an existing hospital committee, such as the hospital's Patient Experience or Quality Improvement committees.

**Intent.** The intent of this metric is for hospitals to develop formal relationships with PFAs from the local community—who are former patients and represent the patient population—who can provide input and guidance from the patient perspective on hospital operations, policies, procedures, and quality improvement efforts. The relationship may be via a mechanism such as a PFAC or involvement on other hospital committees in which advice, input, and active involvement from patients and family advisors is gathered on a regular basis. Patient representatives on hospital committees should have all the same rights and privileges of all other committee members, and efforts should be made to enable these representatives to share their unique perspective as patients or family members at meetings. Ultimately, this metric confirms that a hospital systematically incorporates patients and care partners as advisors when addressing operations or quality improvement activities.

**Benefits.** Partnering with PFAs at the organizational level brings the perspectives of patients and families directly into the planning, delivery, and evaluation of care. More specifically, PFAs can (1) offer insights into what the hospital does well and areas where change may be needed, (2) help develop priorities and make improvements based on patient- and family-identified needs, and (3) serve as a link between the hospital and the broader community. The long-term benefits of working with PFAs include improvements in overall systems and processes of care, including reduced errors and adverse events, improved health outcomes for patients, and better experiences of care.<sup>2</sup>

<sup>2</sup> Charmel PA, Frampton SB. Building the business case for patient-centered care. *Healthc Financ Manage* 2008;62(3):80–5.

## Tips to Maximize Impact

- Be intentional during the recruitment process; some patients and family members may not be ready or do not have the skill set to serve as PFAs. Utilizing specific processes for referral, application, and interviewing helps identify candidates who are the best fit and allows candidates to self-select out of the process as desired.
- Partner with trusted community groups (e.g., faith communities, social service agencies, advocacy groups) that have deep relationships with the populations underrepresented to assist in recruitment and outreach to PFAC or advisor opportunities.
- Before working with PFAC members or advisors on specific projects, provide a clear description of the project, activities, scope of work, related work that has been done in the past, and how advisor input will be used.
- Help PFAs articulate and tell their stories in a constructive way that highlights opportunities for partnership at all levels of the hospital setting.
- Ask for feedback from and provide feedback to PFAs about the impact of their individual and collective contributions on an ongoing basis so that the experience is meaningful for them.

*"Be brave and share [quality] data... Organizations need to be thoughtful about transparency—and provide the same data to PFAs. PFAs cannot commit to co-design if they are not working with the same data as hospital leaders, clinicians, and staff."*

— Libby Hoy, Founder/CEO, PFCCpartners

*"Hospitals should follow up with PFAs to share the outcomes of the project and how it will be sustained—PFAs want to feel like contributors and not participants...PFAs want to know that the hospital staff are equally committed to PFE."*

— Laura Lundquist, PFA, Sutter Health

*"Just do it—start small, be brave, and serve food."*

— Christine O'Farrell, Director of Quality Management, Barton Healthcare

for partnership at all levels of the

The **Appendix** provides suggested activities to meet PFE metric 4.

## PFE Metric 4 Success Story

### ***Maine Coast Memorial Hospital PFAC helps hospital achieve zero falls rate.***

Maine Coast Memorial Hospital (MCMH), a small rural hospital in Ellsworth, Maine, and a member of the Vizient HIIN, decided to create a PFAC after hearing about the value that PFACs provided at other hospitals. Specifically, MCMH wanted to address safety and quality issues through its PFAC, referred to as a Patient and Family Partnership Council for Quality and Safety. The PFAC brainstormed potential initiatives at its inaugural meeting and decided to tackle patient falls—falls rates in the medical-surgical unit were above the national average, despite efforts to educate nurses and patients.

In addition, MCMH had a multidisciplinary patient falls taskforce that was willing to partner with the PFAC. The PFAC launched the “Catch a Falling Star” program to

identify and address strategies—based on the patient perspective—to reduce and prevent patient falls, including strategies related to signage, which MCMH quickly implemented. The PFAC launched in January 2015 and, in the first quarter of 2015, the hospital experienced a 0.67 percent falls rate and improved to a zero falls rate in the second quarter. The PFAC has supported numerous other hospital initiatives since its successful contributions to efforts to reduce patient falls. To learn more, read the [case study](#), “Patient Safety and Quality Spotlight: Using a Patient and Family Partnership Council for Quality and Safety,” available from Vizient, and access the materials from the [June 2016 PFE Learning Event](#), “Developing and Sustaining Partnerships That Improve Patient Safety.”

## Appendix. Applying the PFE Strategies to Meet the PFE Metrics in More Meaningful and Equitable Ways

Six overarching strategies are designed to help hospitals implement PFE practices—including the five PFE metrics—in ways that reflect and operationalize the core PFE principles.<sup>3</sup> The six strategies<sup>4</sup> are organizational partnership; patient and family preparation; clinician and leadership preparation; care, policy, and practice redesign; measurement and research; and transparency and accountability.

### PFE Strategies to Support Effective Implementation of PFE Metric 4: PFAC or Representatives on Hospital Committee

PFE strategy	Tactics
 <b>Organizational partnership</b>	<ul style="list-style-type: none"><li>• If hospital already has PFAs, solicit suggestions for opportunities to expand PFAC or advisor work (e.g., creating new PFACs, workgroups, or committees; identifying projects with which PFACs can be involved).</li><li>• Ask existing advisors to assist with recruiting, interviewing, training, and mentoring new advisors.</li><li>• Explore how to provide advisory opportunities that can meaningfully accommodate language and literacy needs. Consider alternative ways of participating or creating more than one advisory group, if support needs require it (e.g., Spanish-speaking advisory council).</li></ul>

<sup>3</sup> The core PFE principles are (1) PFE involves active partnership; (2) PFE happens at multiple levels; (3) PFE is about identifying and responding to patient- and family-identified needs and desired outcomes; (4) PFE is a partnership that requires individual *and* system behavior change; (5) “Family” is defined broadly and by the individual; (6) PFE must consider the values, preferences, and needs reflected in diverse populations; and (7) PFE is not a “check the box” activity—implementation quality affects results.

<sup>4</sup> The strategies listed below are adapted from the “[Roadmap for Patient and Family Engagement in Healthcare: Practice and Research](#)” and include information gathered during interviews with the 17 HENs in PfP 2.0. Developed by AIR, with funding from the Gordon and Betty Moore Foundation, the Roadmap reflects a unified vision for achieving meaningful PFE across the healthcare system and lays out a path to broader PFE by providing specific strategies, that, when implemented, can help achieve the goals of better care experiences, better health, lower costs, and improved safety.

PFE strategy	Tactics
 <p><b>Patient and family preparation</b></p>	<ul style="list-style-type: none"> <li>Hold an information session to help former patients and care partners who may be interested in serving as advisors understand the role, responsibilities, time commitments, type of training and support provided, and any compensation available (e.g., reimbursement for travel or child care expenses). Hold information sessions in various areas to expand reach to diverse patients and care partners who may be interested in serving on the PFAC.</li> <li>Leverage peer-to-peer support programs and connections to help recruit members from vulnerable patient populations to serve on the PFAC.</li> <li>Partner with the hospital's Volunteer Services Program to select advisors and hold an orientation session to describe expectations, roles, responsibilities, and procedures. Provide training to prepare them to interact confidently with hospital leaders, clinicians, and staff.</li> <li>If hospital already has advisors, identify existing advisors who can serve as mentors to new advisors during the onboarding process.</li> <li>Prior to working with PFAC members or advisors on specific projects, provide a clear description of the project, activities, scope of work, related work that has been done in the past, and how advisor input will be used.</li> <li>Educate advisors about key quality and safety terms and ensure that plain language is used in all materials and conversations.</li> </ul>
 <p><b>Clinician, staff, and leadership preparation</b></p>	<ul style="list-style-type: none"> <li>Gather information about clinician, staff, and leadership ideas for changes and improvements.</li> <li>Talk to hospital leaders about the benefits, importance, and value of working with PFAs or including advisors as members of quality and safety teams. Identify and address attitudes, beliefs, and experiences that may serve as potential barriers to effective partnership with advisors.</li> <li>Hold small-group meetings to encourage clinicians, staff, and leaders to brainstorm ideas for involving PFACs and patients in specific projects.</li> <li>Identify clinicians and staff who can serve as informal leaders and champions for working with PFAs and PFACs.</li> <li>Provide training for leaders, clinicians, and staff about how to work effectively with PFAs.</li> <li>Work with the PFAC to develop training activities for clinicians on culturally competent care.</li> </ul>

PFE strategy	Tactics
 <p><b>Care, policy, and process redesign</b></p>	<ul style="list-style-type: none"> <li>• Identify a staff liaison to oversee and coordinate PFA and PFAC work, including recruiting and training advisors, identifying opportunities for projects; ensuring that PFACs and quality and safety teams are functioning effectively, and reporting to hospital leadership about accomplishments.</li> <li>• Specify eligibility criteria for patient PFAC membership or participation on a quality or safety committee, develop recruitment and interview processes that enable the ongoing identification and selection of effective PFAs, and interview potential candidates to determine match between hospital's needs and patient's interests.</li> <li>• Outline general roles and responsibilities of PFAC members or quality and safety committee members and, with new PFAC members, draft a general mission statement and charter for the PFAC.</li> <li>• Ensure that PFAC education and training materials are available in various communication formats and languages; use plain language and ensure access to sign or language interpreters.</li> <li>• Identify several projects for PFACs to work on or opportunities to bring advisors on to quality and safety teams. Where possible, obtain input from patients, families, staff, and the community to identify priority projects. Determine where priorities align with hospital priorities and where they differ.</li> <li>• Develop a longer-term vision for working with advisors while planning smaller, immediate action steps.</li> <li>• Identify opportunities for extending work with advisors outside of the hospital walls (e.g., as advisors for community health).</li> </ul>

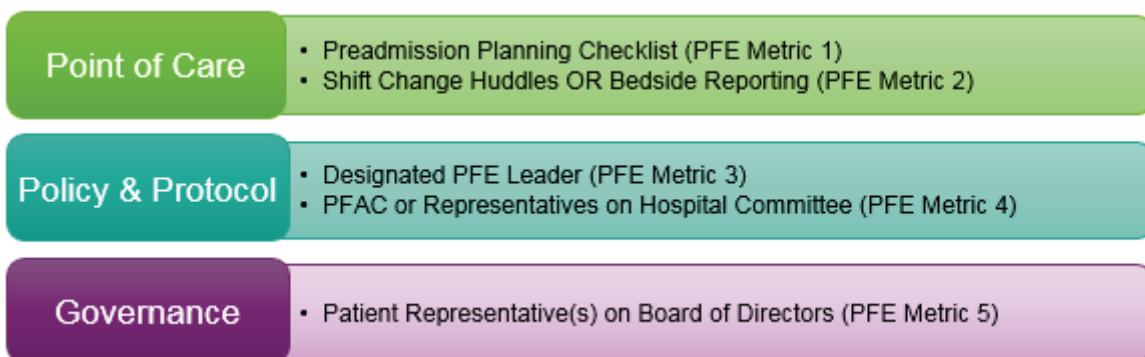

PFE strategy	Tactics
 <b>Measurement and research</b>	<ul style="list-style-type: none"> <li>Identify metrics to track accomplishments (e.g., number of advisors recruited, number of active advisors, number and type of efforts in which advisors are involved, examples of work completed, outcomes of projects on which advisors participated).</li> <li>Review the composition of the PFAC and the advisory program to determine opportunities to ensure the membership reflects all populations served, especially vulnerable populations.</li> <li>Collect data about PFA experiences (e.g., extent to which they felt prepared to participate, extent to which they felt their input was welcomed, extent to which they felt their participation affected the work and outcomes).</li> <li>Collect data from clinicians and staff about their experiences working with PFAs (e.g., extent to which they believe advisor input was helpful, extent to which they believe advisor input affected outcomes of the work).</li> <li>Identify and monitor measures related to specific quality and safety issues or projects on which advisors work.</li> <li>Collect data to track PFAC activities, experiences, and impact on hospital policies and practices as they relate to equity and disparity issues.</li> </ul>
 <b>Transparency and accountability</b>	<ul style="list-style-type: none"> <li>Share data and information equally with advisors.</li> <li>Encourage chairs of quality and safety committees to model transparency and ownership of quality- and safety-related issues.</li> <li>Establish feedback procedures. Follow up with PFACs and advisors about how their input was or was not used and provide clear explanations when input was not used.</li> <li>Share accomplishments with hospital leadership. Communicate accomplishments publicly in multiple ways (e.g., on the hospital website, in staff trainings, in board meetings, in community meetings).</li> <li>Share success stories and examples of areas in which PFAC input helped inform efforts to improve quality and safety, specifically related to disparities and equity.</li> <li>Share improvements and lessons learned with other hospitals.</li> </ul>

# PfP Strategic Vision Roadmap for Person and Family Engagement—Metric Digest

## PFE Metric 5: Patient Representative(s) on Board of Directors

Person and family engagement (PFE) helps hospitals address what matters most to patients and families and improves hospitals' ability to achieve long-term improvements in quality and safety. Five PFE metrics<sup>1</sup> guide the implementation of PFE within the Partnership for Patients (PfP). The purpose of the five PFE metrics is to ensure that hospitals have, at a minimum, structures and practices that enable active patient and family partnership at three levels of the hospital setting: point of care, policy and protocol, and governance (see Exhibit 1).

**Exhibit 1: Partnership for Patients PFE Metrics, by Level of Hospital Setting**

This document provides guidance on the purpose and implementation of **PFE Metric 5 (patient representatives on board of directors)**, including how to apply six PFE strategies to meet the metric in meaningful and equitable ways. The Person and Family Engagement Contractor for PfP has developed a metric digest for each PFE metric that draws from the [PfP Strategic Vision Roadmap for Person and Family Engagement](#). Please refer to the full Roadmap for further information on definitions and core principles of PFE, the role of PFE in patient safety, the intersection of PFE and health equity, and six PFE strategies to meet the five PFE metrics.

<sup>1</sup> The five PFE metrics are preadmission planning checklist (metric 1), shift change huddles OR bedside reporting (metric 2), designated PFE leader (metric 3), PFAC or representatives on hospital committee (metric 4), and patient representative(s) on board of directors.

**PfP Metric Language.** Hospital has one or more patient(s) who serve on a governing and/or leadership board as a patient representative.

**Do We Meet the Metric? YES, if:**

- The hospital has at least one position on the board designated for a patient or family member who is appointed to represent that perspective, **OR**
- If a specific board representative is not possible, the hospital has implemented one of the alternatives to the metric to incorporate the perspective of patients and families when making hospital governance decisions (see options below under “Alternative”).
- Hospitals are encouraged to consider and pursue options for achieving the intent of the metric.

**Alternative:**

While designating at least one patient representative on the board is the preferred mechanism to ensure co-governance, certain laws, policies, or circumstances may not allow the formation of a patient or family representative seat on the board. In these cases, hospitals are encouraged to pursue alternative options that achieve the intent of this metric and qualify as a “yes” response, including the following:

- Asking for PFAC input on matters before the board and incorporating a PFAC report into the board agenda.
- Identifying elected or appointed board members to serve in a specific role, with a written role definition, representing the patient and family voice on all matters before the board.
- Requiring all board members to conduct activities that connect them closer to patients and families, such as visiting actual care units in the hospital two times per year and/or attending two PFAC meetings per year.

**Intent.** The intent of this metric is to ensure that at least one board member with full voting rights and privileges provides the patient and family perspective on all matters before the board, similar to other board members who represent specific interests in the community. While current board members may have had experiences as patients at the hospital (or as family members of patients), the intent is to bring in individuals who do not serve the board in any other professional capacity and whose sole purpose is to be a patient representative and contributor. The goal of this activity is to ensure that the board includes patient and family perspectives when making governance decisions at the hospital.

**Benefits.** Developing a governance structure that supports and exemplifies partnership with patients and family advisors signals and solidifies an organization's commitment to PFE at the highest level. PFA partnership at this level ensures that governance decisions reflect patients' and families' priorities, values, and needs.

### Tips to Maximize Impact

- Consider incremental but meaningful steps—for example, establishing a PFAC as a first step toward meeting this metric.
- Thoughtfully recruit PFAs to the board with consideration toward the diversity of the community, personal characteristics, and passion for the hospital's mission.
- Provide training to the PFA to prepare them to serve effectively on the board.

**Appendix A** provides suggested activities to meet PFE metric 5. **Appendix B** provides a sample role description for the patient or family representative on the board of directors.

### PFE Metric 5 Success Story

#### *PFAs at St. Francis Medical Center are “equal partners” on local governing board.*

As a required condition by the California Attorney General for a merger and acquisition transaction, St. Francis Medical Center (SFMC) in Southeast Los Angeles, a part of Verity Health and a member of the Health Services Advisory Group (HSAG) HIIN, created a local governing board to consult on changes to medical services, community benefit programs, charity care services, collection policies, and capital purchases. The board included community representatives from SFMC's 30 primary service zip codes, in addition to SFMC staff and representatives from the Los Angeles County Board of Supervisors. PFAs on the board were recruited based on their status as a patient or family member of a patient, as well as their ability to be constructive and match their personal mission with the hospital's mission to improve care delivery and organizational performance. The PFAs also had to represent the community that the hospital served and be able to speak on behalf of all patients and families, among other criteria. PFAs on the board said they knew they had achieved equal partnership with other board members when people solicited their opinions and felt comfortable meaningfully discussing and challenging their ideas. To learn more, access the materials from the [August 2017 PFE Learning Event](#), “How to Help Hospitals Get Buy-in for PFE at the Governance Level.”

## Appendix A. Applying the PFE Strategies to Meet the PFE Metrics in More Meaningful and Equitable Ways

Six overarching strategies are designed to help hospitals implement PFE practices—including the five PFE metrics—in ways that reflect and operationalize the core PFE principles.<sup>2</sup> The six strategies<sup>3</sup> are organizational partnership; patient and family preparation; clinician and leadership preparation; care, policy, and practice redesign; measurement and research; and transparency and accountability.

### PFE Strategies to Support Effective Implementation of PFE Metric 5: Patient Representative(s) on the Board of Directors

PFE strategy	Tactics
 <b>Organizational partnership</b>	<ul style="list-style-type: none"><li>Ask PFAs to attend board meetings to share their stories of how they developed into their role as a PFA and their impact on quality and safety to illustrate the value of having one or more patient members on the governing or leadership board.</li><li>Work with PFAs and board members to understand potential barriers to effective participation on governing or leadership boards by a patient member.</li><li>Include members of vulnerable populations intentionally to ensure that traditionally marginalized voices are heard and represented.</li></ul>

<sup>2</sup> The core PFE principles are (1) PFE involves active partnership; (2) PFE happens at multiple levels; (3) PFE is about identifying and responding to patient- and family-identified needs and desired outcomes; (4) PFE is a partnership that requires individual *and* system behavior change; (5) “Family” is defined broadly and by the individual; (6) PFE must consider the values, preferences, and needs reflected in diverse populations; and (7) PFE is not a “check the box” activity—implementation quality affects results.

<sup>3</sup> The strategies listed below are adapted from the “[Roadmap for Patient and Family Engagement in Healthcare: Practice and Research](#)” and include information gathered during interviews with the 17 HENs in PfP 2.0. Developed by AIR, with funding from the Gordon and Betty Moore Foundation, the Roadmap reflects a unified vision for achieving meaningful PFE across the healthcare system and lays out a path to broader PFE by providing specific strategies, that, when implemented, can help achieve the goals of better care experiences, better health, lower costs, and improved safety.

PFE strategy	Tactics
 <b>Patient and family preparation</b>	<ul style="list-style-type: none"> <li>• Leverage peer-to-peer support programs and connections to help recruit members from vulnerable patient populations to serve on governing or leadership boards.</li> <li>• Provide training for the patient board member to describe expectations, roles, responsibilities, and procedures.</li> <li>• Identify someone who can serve as a resource for or mentor to the patient member of the governing or leadership board.</li> <li>• Educate patient governing and leadership board members about quality and safety issues, financial terms, PFE, and overall responsibilities of the governing/leadership board. Prepare them to interact effectively at an equal level with other board members.</li> <li>• Provide culturally and linguistically appropriate educational tools, materials, and resources with examples of how to engage as a representative on governing or leadership boards.</li> </ul>
 <b>Clinician, staff, and leadership preparation</b>	<ul style="list-style-type: none"> <li>• Provide training to hospital board members about quality and safety issues, health equity, and PFE, including orientation for all new board members.</li> <li>• Provide training to hospital board members about how to partner effectively with patient representatives on the board.</li> <li>• Share success stories and effective practices from other hospitals who have worked with patients as members of boards and governing bodies.</li> </ul>
 <b>Care, policy, and process redesign</b>	<ul style="list-style-type: none"> <li>• Develop role descriptions for patient board members that include qualifications, responsibilities, and expectations.</li> <li>• Develop selection criteria and a vetting process for patient board members to ensure that the patient perspective is represented via the inclusion of individuals who identify themselves as patients first. Ensure that selection criteria include consideration of diversity so that patient board members are representative of the community that the hospital serves.</li> <li>• Identify and address barriers to full and effective participation by patient board members (e.g., ability to travel, timing of meetings, voting rights).</li> <li>• Develop processes for peer-to-peer guidance and mentorship of struggling board members (patients and others).</li> <li>• Include opportunities for education about and review of PFE initiatives and related issues at each board meeting.</li> </ul>

PFE strategy	Tactics
 <b>Measurement and research</b>	<ul style="list-style-type: none"> <li>Develop metrics to understand how patient member(s) have been included (e.g., percentage of meetings at which patient board member was present, whether patient board member has decision-making authority equal to other members).</li> <li>Collect data to track representatives' involvement in the activities of the governing board, as well as their experiences and impact on hospital policies and practices.</li> <li>Conduct self-evaluations and assessments of the board annually. Use the assessments to identify education needs or process improvements.</li> <li>Identify specific initiatives or system-level measures that can be used to assess board performance relative to PFE.</li> </ul>
 <b>Transparency and accountability</b>	<ul style="list-style-type: none"> <li>Make public the organization's commitment to include a patient member of the board.</li> <li>Report on the diversity of board representatives.</li> <li>Share results of board self-assessments and evaluations, including areas for improvement, with leaders, clinicians, staff, patients, families, and the community.</li> <li>Share success stories and examples of areas in which representative input helped to inform efforts to improve quality and safety, specifically related to disparities and equity.</li> <li>Continually develop the board's capability and share best practices with other hospital leaders.</li> </ul>

## **Appendix B. Sample Role Description: Patient or Family Representative on the Board of Directors**

### **Person and Family Engagement in Partnership for Patients**

#### **PFE Metric 5: Patient or Family Representative on the Board of Directors - Sample Role Description**

To support hospitals in their efforts to meet PFE Metric 5 (Patient Representative(s) on Board of Directors), the Patient & Family Engagement Contractor (PFEC) for Partnership for Patients (PfP) has developed the following sample language.<sup>4</sup> This language is intended to help hospitals understand and communicate desired characteristics, qualifications, and responsibilities of individuals who will represent patient and family interests on the Board. Additional strategies and tactics to meet PFE Metric 5 are included in the [PfP Strategic Vision Roadmap for PFE](#).

#### **Important Notes: How to Use this Role Description**

- **Begin with your hospital's existing position description for Board members.** Then include language specific to the patient or family representative role to meet the intent of this metric. Although these members will represent the patient and family perspective, this position should serve in the same capacity as all other full voting Board members.
- **PFE Metric 5 is intended to ensure that a Board member has the specific responsibility of representing and/or presenting the patient and family perspective in governance decisions.** However, hospitals may vary in how this perspective is incorporated into its existing Board structure. The requirements, duties, and qualifications outlined below may inform a hospital's approach, but should be adapted to fit the structure and format of the Board's unique configuration. For example, you may add a seat to your existing Board or delegate a current position on the Board to focus solely on representing the patient and family perspective.
- **As with any role description, the below example outlines an idealized candidate.** Hospitals should be flexible and realistic as they consider potential candidates for the position. Ideally, the position should be filled by a patient or family member who has received services from the hospital, but this individual also should meet all other qualifications required of other Board members.

**Board Member Position:** Patient or family representative on [insert Hospital/Medical Center name] Board of Directors

<sup>4</sup> Much of this language draws from the following sources: (1) [American College of Healthcare Executives \(ACHE\) Basic Responsibilities of a Board and Its Members](#), (2) [PfP August 2017 PFE Learning Event](#), featuring St. Francis Medical Center (Health Services Advisory Group HIIN), and (3) The Valley Hospital (New Jersey Hospital Association HIIN) Patient and Family Advisor job description.

**Function:** To participate in the governance of the hospital by serving as a Board member with full voting rights and privileges, providing the patient and family perspective on all matters before the Board, similar to other Board members who represent specific interests in the community.

**Core Requirements:**

Patient or family representatives on the Board of Directors must have the ability to:

- Understand the broader perspectives and experiences of patients and families who receive care at the hospital or from the health system, including those from different social, economic, cultural, and religious backgrounds, and demographics other than their own
- Uphold the hospital's and Board's code of ethics and commitment to confidentiality
- Understand and support the hospital's strategic initiatives and goals
- Offer insights and constructive feedback
- Participate in Board orientation, continuing education, Board evaluations, and self-appraisals
- Commit the time to attend and prepare for required meetings as outlined by the hospital

**Specific Duties:**

- Ensure that hospital governance decisions reflect patient and family perspectives, priorities, values, and needs
- Present opportunities for improvement from the patient and family perspective
- Participate in hospital program and policy development, review, implementation, and evaluation while providing the patient and family perspective
- Educate fellow Board members and hospital staff about patient- and family-centered care and best practices for partnering with patients and families
- Seek out opportunities and encourage Board members to interact directly with patients and families who receive care at the organization and those who serve in patient and family advisor/leadership roles
- Prepare for and attend all annual, regular, and special Board meetings
- Help establish CEO evaluation criteria and participate in decisions related to supporting, rewarding and, when necessary or desirable, changing top management
- Elect officers at annual Board meetings
- Assist as appropriate in fundraising activities
- Represent the hospital to and in the community

**Qualifications:**

- Experience as a former (within 3 to 5 years) patient or family member/care partner at the hospital who has not served the Board in any other professional capacity
- Experience working as a patient or family advisor who collaborates with healthcare professionals at the hospital or health system level in planning, implementing, and/or evaluating change and improvement
- Must be collaborative, solution-oriented, community-oriented, respectful, and professional, and possess organizational awareness and the ability to lead change
