IMMUNIZATION COALITION
"A shield across a lifespan"

O U R M I S S I O N

To provide awareness to the community and region about vaccine preventable diseases through quality education and outreach.

who we are

The Sioux Falls Area Immunization Coalition is a network of dedicated community partners working together to increase immunization rates and prevent disease through education and outreach. The coalition is comprised of health care and public health professionals, community leaders, parents, businesses and others who are interested in improving vaccination rates in Sioux Falls, South Dakota and the surrounding area. Coalition members are committed to advocating, educating and delivering services to increase immunization rates for all age levels – children, teens and adults – and to serving as an important source of immunization information for health care professionals and their patients.

what we do

The coalition focuses on different areas of immunization promotion such as making sure children get vaccinated before they enter school and senior citizens receive influenza vaccines; raising community awareness about the value of vaccines; and other focuses where members' expertise and experience can impact immunization rates and overall health. Through information distribution, workshops, conferences and other outreach activities, the coalition works to enhance the delivery of safe and effective immunization services and to facilitate communication about the safety, efficacy and use of vaccines within the broad immunization community of patients, parents, health care organizations, and government health agencies.

join the coalition

If you would like to join the Sioux Falls Area Immunization Coalition and partner with us to promote the importance of vaccinations and provide helpful and informative education and outreach resources, e-mail us at izcoalition.sf@gmail.com.
