

Upcoming Sexual Assault Nurse Examiner (SANE) Training

What is the SANE Program?

The main goal of the SANE Program is to coordinate resources and to provide support for healthcare professionals across the state in order to improve the access and the delivery of services to both child and adult victims of sexual assault.

The program: 1. holds quarterly workshops, 2. fosters a peer-led SANE Learning Collaborative, and 3. coordinates a listserv for healthcare professionals interested in learning more about forensic nursing.

Members of this listserv will be able to ask questions amongst peers, access on-line resources, and be notified of upcoming meetings & trainings. Please sign up for the SANE listserv by visiting:
